In the Specification:

At page 18, lines 11 through 13,

.....Or, as another embodiment, it might remain in the position shown, and a locking mechanism to keep links 156 & 158 at a constant position might be able to compress sheath 170 over the two links. A tether [[180]] 188 sets a limit on the separation of points A and B, and guarantees that electrodes are evenly spaced when the length of tether [[180]] 188 equals the length of span 140.
